NOTES:

- 1/ Any solar array development proposal would require FAA coordination prior to project approval.
- 2/ The relocation of Orchard Street and the W. Aerona Street extension are Ada County Highway District projects. Funding, design, and construction of these projects are the responsibility of the Ada County Highway District.
- 3/ Limits of landfill area are not depicted. Determination of landfill extents is recommended before construction in the vicinity of the site.
- 4/ For a comprehensive depiction of existing airfield facilities, see Existing Airport Layout Plan (Sheet 01).
- 5/ For additional PAC/SACS information, see the Airport Data Sheet (Sheet 1).
- 6/ Future regional road locations to be coordinated with ADA County Highway District.
- 7/ Areas depicted as "future" are considered developments that may occur within the Master Plan planning horizon. Areas depicted as "ultimate" are those that could occur following the Master Plan planning horizon.
- 8/ Details concerning terminal improvements are depicted on the Terminal Area Plan (Sheet 02).
- 9/ National Interagency Fire Center buildings are off airport property. Only those that are ramp adjacent are identified.
- 10/ It is standard operating procedure for active military aircraft to proceed to an arm/dismant pad before entering the runway environment. The current active military flight line is anticipated to be relocated from the west apron to the east apron.
- 11/ Full build-out of future terminal facilities is depicted for purposes of this drawing. Terminal development will be phased to correspond with future facility/operational needs and in coordination with airport tenants.
