Forecast Approval Letter

Dear Mr. Burrows:

The Federal Aviation Administration (FAA) reviewed forecast information for the Boise Airport received on October 1, 2026.

This letter serves as the FAA approval of the forecast summarized in Table 4-10 located in the master plan narrative report. The FAA also approves baseline scenario through year 2036 for use in the Boise Airport master plan update. We found the forecast to be supported by reasonable planning assumptions and current data.

The approval of the forecast does not automatically constitute a commitment on the part of the United States to participate in any development recommended in the master plan or shown on the ALP.

FAA approval of this forecast does not constitute justification for future projects. Justification for future projects will be made based on activity levels at the time the project is requested for development, in accordance with criteria in FAA Orders 5090.5 and 5100.38.

Documentation of actual activity levels meeting planning activity levels will be necessary to justify AIP funding for eligible projects. Further, the approved forecast may be subject to additional analyses if the fundamental rationale of the forecast changes materially.

If you have questions, please call me at (406) 441-5408.

Sincerely,

Jennifer Schildgen
